HOW TO USE THE CERAMIC CASSEROLE

IMPORTANT PRECAUTIONS: Like any ceramic, the Casserole may crack or break if not handled properly resulting in injury or property damage.

To prevent damage to the Casserole:

- Always handle with care as all ceramic is breakable.
- Always use potholders when handling hot containers.
- **DO NOT** place hot Ceramic Casserole on counter. Use heat resistant trivet.
- **DO NOT** place Ceramic Casserole or Lid on range top burner, under a broiling or microwave browning element or in a toaster oven.
- **DO NOT** place hot Ceramic Casserole or Lid in a sink or on cold wet surfaces.
- **DO NOT** use the Ceramic Casserole to pop corn, caramelize sugar or make candy.
- **DO NOT** use abrasive cleansers or scouring pads or any object that could scratch the Ceramic Casserole or Lid.
- **DO NOT** repair or use if any part is chipped, cracked or broken.

USE: The Ceramic Casserole may be used in a conventional, convection, or microwave oven so long as it is not heated under a broiler or top browning element. **NEVER** use the Glass Lid in any type of oven. Both the Glass Lid and Ceramic Casserole can be cleaned in a dishwasher and also be used to store food in the refrigerator or freezer.

CARE: Use only wooden or plastic utensils. Metal utensils can scratch or mark the ceramic. The Casserole can be washed by hand or in a dishwasher.

DO NOT allow the Ceramic Casserole to soak or stand in water for an extended period of time. Heating the Casserole after soaking may cause the surface to craze. If scouring is required use only plastic or nylon pads with non-abrasive cleansers.

- **NEVER** subject the Casserole to sudden temperature changes such as moving it from the refrigerator directly into the oven or immersing it in water when it is hot.
- **NEVER** add cold water to a hot Ceramic Casserole.
- **NEVER** place it in contact with direct intense heat such as on a range burner or under a broiler element.
- **NEVER** heat the Casserole when it is empty. **NEVER** preheat the Base.
- **NEVER** add cold food from the refrigerator directly to the Casserole.
- **ALWAYS** unplug the Base and allow the Casserole to cool before cleaning.

HOW TO USE THE GLASS LID

IMPORTANT PRECAUTIONS: The Glass Lid may shatter if exposed to direct heat or sudden temperature changes. Chips, cracks or deep scratches may also weaken the Lid. If the Lid becomes chipped, cracked or scratched, do not use it. Discard it and order a replacement.

ALWAYS allow Lid to cool on a dry heat resistant surface before handling.

NEVER place it on a cold or wet surface as this may cause it to crack or shatter.

NEVER uses the Glass Lid in a conventional, convection or microwave oven.

HOW TO USE THE MULTIPOT

A MultiPot is easy to use but it is different from conventional cooking. This booklet is intended to be used as a general guideline and contains several suggestions and helpful hints for successful slow cooking. There is an abundance of recipes specifically designed for slow cooking that can be easily found on the internet or in recipe books in your local bookstores and libraries.

1. Place the MultiPot on a dry level surface. Add recipe ingredients to the Ceramic Casserole and cover with Lid. Place Ceramic Casserole in MultiPot base.
2. Plug unit into the wall outlet. The digital display will flash "- - - -".

3. Press the Temperature Button to select Low, High or Warm. (Press once for Low, twice for High, 3 times for Warm and 4 times for Stand Time.) The default setting of 6 hours (6:00) will be shown in the Digital Display if you have selected Low, High or Warm. Nothing will be shown in the Digital Display if you have chosen "Stand Time". After 3 seconds the Indicator Light will illuminate under Low, High or Warm, depending on your selected setting.
4. Set the required amount of time by pressing the "Time" Button. Each time you press the Time Button the time will increase by 30 minutes, to a maximum of 10 hours. If you don't press the Time Button for 3 seconds the cooking time will be the time showing in the Display Window.

NOTE: If you prefer less cooking time than the default setting of 6 hours, continue to press the Time Button past 10 hours and the Cook Time will display 30 minutes. Press to increase the time by 30 minute increments.

5. Once the Cooking Time is finished, the unit will switch to "Stand Time" mode for 10 minutes. The Digital Display will countdown the 10 minute Stand Time then will automatically switch to Warm. The default time of the Warm cycle is 10 hours.
6. Once the 10 hours has elapsed, the MultiPot automatically switches to Stand Time. The indicator Lights will go out and the Display shows "- - - -". Unplug the unit from the wall outlet.

NOTE: To stop heating during the cooking process, press the Temperature Button until the remaining cooking time blinks in the Digital Display and the Indicator Light goes out. Wait 5 seconds and the unit will switch to the Stand Time cycle and the Digital Display blinks "- - - -". Unplug the MultiPot.

HELPFUL HINTS USING THE MULTIPOT

- The Lid does not form a tight seal with the Casserole. However, it should be centered on the Casserole for the best results.
- Stirring is not required while slow cooking. However, when cooking on High, stirring occasionally will help distribute flavours.
- For best results Casserole should be at least half full.

- For soups and stews, leave a 2" (5 cm) space between the food and the top to allow ingredients to simmer. When cooking on High setting, keep checking from time to time as some soups and stews may come to a boil.
- When slow cooking, it is more appropriate to use less tender, cheaper cuts of meat than the more expensive varieties. Remove excess fat before cooking and if called for, brown the meat on a range top using a metal frypan before adding meat to the Casserole.
- The greater the fat content in the meat the less liquid is required. When cooking meat with high fat content, place thick slices of onion under the meat so that it will not sit and cook in the fat. Roasts, when cooked on Low, may be prepared without adding any liquid.
- Use a meat thermometer to determine if the meat has been cooked to your taste.
- Fresh or thawed fish or seafood should be added to the Casserole only 1 hour before serving as they can fall apart during prolonged cooking.
- Since raw vegetables take longer to cook than meat, cut them into small pieces 1 / 2" (12mm) diameter before adding to Casserole.
- Milk, sour cream or other dairy products should be added just before serving as these tend to break down during prolonged cooking. You may substitute condensed milk or evaporated milk. Processed cheese may also be used instead of naturally aged cheese.
- Rice and pasta may be cooked separately or added uncooked to the ingredients no more than two hours before serving. If the pasta is uncooked there should be at least 2 cups of liquid in the Casserole. Stir occasionally to prevent pieces from sticking together.
- To thicken juices or make gravy at the end of the cooking cycle, make a smooth mixture of 2 to 4 tbsps. (30 – 60 ml) of cornstarch, 1/4 cup (60 ml) of water, and 2 tbsp. (30 ml) of butter. Remove cooked food from Casserole. Add the mixture to the juices remaining in the Casserole, set to High and stir until liquid thickens.
- Do not worry if the food remains in the MultiPot longer than planned. The MultiPot cooks very slowly and will be very forgiving if you are running a little late.

GENERAL RECIPE INSTRUCTIONS

- 1. Prepare recipe according to directions.
- 2. Place food in Ceramic Casserole and cover with Lid.
- 3. Use the following chart to help adapt your favorite recipes to the MultiPot. These times are approximate and should be used only as general guidelines.

TIME CONVERSION CHART

Regular cooking	MultiPot Time	
Time	Low	High
30 minutes	7-8 hours	3-4 hours
35-60 minutes	8-9 hours	4-5 hours
1-3 hours	9-10 hours	5-6 hours

- 4. Follow the instructions in the 'How to Use the MultiPot' section.
- 5. Using a potholder or oven mitt, carefully remove Lid.
CAUTION: When removing Lid, grasp the knob and slowly lift the side that is away from you to allow the steam to escape before setting the Lid aside. To avoid burns, always hold the Lid so that escaping steam flows away from your hands, arms and face.
- 6. Using potholders or oven mitts grasp the Ceramic Casserole by the handles on either end and remove from the Base.
- 7. Always place a trivet under the Casserole before placing on table or countertop. Serve contents.

HELPFUL HINTS FOR ADAPTING RECIPES

- The Low setting is recommended for all day cooking. Most meat and vegetable combinations require at least 7 hours on Low.
- For best flavour use whole leaf herbs and spice during the initial preparation. If ground herbs and spices are used, stir in during the last hour of cooking.
- The time required to cook is affected by many factors. The water and fat content of the food, its starting temperature, and the size of the pieces will all affect the cooking time. For example, meat cut into pieces will cook faster than a whole roast. Adjust the time accordingly.
- Recipes for vegetable casseroles must contain liquid to prevent scorching of the sides of the Casserole.
- You may choose to substitute ingredients in a recipe. For example, a 12 oz. can of chicken broth could be replaced by a 10 oz. can of tomato soup and 2 oz. of another liquid such as water or wine.
- Canned beans may be added directly to any recipe. However, dried beans (especially red kidney beans) should be soaked in water and boiled first. After boiling in 3 times their volume of unsalted water, discard water and add beans to recipe. NOTE: Beans must be softened completely before they are combined with sugary and/or acidic foods, as these have a hardening effect on beans. In this case, beans should be allowed to simmer until tender after boiling (about 1-1/2 hours).

CARE AND CLEANING

1. This appliance should be cleaned after every use. Before cleaning unplug the Base and allow the appliance to cool. **DO NOT** use harsh detergents or abrasive cleansers on any part of the appliance.
2. Wash the Casserole and Lid in warm soapy water. Rinse well and dry. If food sticks to the surface of the Casserole, fill it with warm soapy water and let stand for an hour before cleaning. Casserole and Lid may be washed in a dishwasher. To prevent damage place them carefully in a rack so that they do not touch each other or any other object during the cleaning cycles.
3. Wipe exterior and interior of Base with soft damp cloth. Dry with a soft cloth. **DO NOT** immerse the Base or power cord and plug in water or any other liquid. To remove any stains from the Ceramic Casserole clean with non-abrasive cleanser or apply a thin paste of baking soda to the affected areas. To remove water spots or mineral deposits wipe with distilled white vinegar. Clean in warm soapy water, rinse and wipe dry with a soft cloth.
4. Store all parts of the MultiPot only once they are clean and dry. Never store when the Casserole is wet. To store, place Casserole inside Base and wrap Lid in a soft cloth or towel before storing upside down on the Casserole. Never wrap the power cord around the Base.
